Version 5.5 Installation Instructions

Please follow these steps carefully to ensure proper installation

If you have not bought the British English dictionary, omit Steps 9, 10 & 11

1. Make sure you have installed a recent version of the [Acrobat Reader](#), and then re-boot
2. Right-click the .exe file you [downloaded](#) (swp-pro550.exe, sciword550.exe or scinoteb550.exe) and select "Run as Administrator". Alternatively, insert the CD; let it autostart, or Run D:\setup.exe.
Windows 10 users: for possible problems, please see [here](#) (Item 6)
3. At the request for your Serial Number, enter the program Serial Number supplied:
____ - ____ - ____ - ____ - ____ - ____ - ____ - ____ - ____ - ____
(including the hyphens), and click on 'Install'. **CAUTION:** We recommend that you do NOT accept the default option to overwrite and delete your existing installation. Choose the 'Typical' installation
4. At the end of the installation process, click 'Yes' on the Register dialog box to register now
5. Select the Web option if your computer is connected to the Internet, click on 'Next' and enter your name and Email address. (Otherwise – slower – Email [us](#) to obtain a machine-specific unlock code)
6. If you bought a v5.5 British English dictionary, enter the dictionary Serial Number (including the hyphens) in the Registration Information (but **first see** our [February 2014 mailing](#) Item 2):
____ - ____ - ____ - ____ - ____ - ____ - ____ - ____ - ____ - ____
Click on OK, then click OK to acknowledge if "the version number in your serial number does not match the installed system" (eg. if you are using a v6.0 serial number with the v5.5 program)
7. Read the licensing information and, if appropriate, select 'I accept this agreement' – OK
8. Click on 'Register Now' and you will receive a message saying: "Your license has been received and saved". Click 'OK'. Remove the CD (if applicable), and click on 'Finish' to reboot
 - For home use systems attached to a campus-wide Site Licence, your installation will not work until your licence information has been forwarded to you by Email from your Site Licence Administrator. Copy the entire licence Email to the clipboard, close Scientific Word/WorkPlace/Notebook, and re-open the program; this creates your licence file. To ensure the Site Licence Administrator can confirm your status/eligibility, please use your official company/University Email address when Registering in Step 5
 - For standalone systems, your licence file will be created automatically by Registering
9. After rebooting, right-click the v5.5 program icon on the desktop and Run as Administrator. Go to Help – System Features, click 'Install Dictionary' and locate \dict55\InstallD.exe (either insert the CD and look in D:\dict55\ , or download the [zip file](#) and extract to c:\sw[p]55\dict55\)
10. Click on Finish. Close the program and then re-start the program (no need to re-boot)
11. Go to Tools – Spelling – Language Options and set the default language to British English
12. Click the v5.5 program icon on the desktop. Go to Help – System Features and check you have a dozen or so lines saying 'Available' (including British English, if applicable)
