Version 5.5 Installation Instructions

Please follow these steps carefully to ensure proper installation

If you have not bought the British English dictionary, omit Steps 9, 10 & 11

1. Make sure you have installed a recent version of the Acrobat Reader, and then re-boot

2. Right-click the file you downloaded (`swp-pro550.exe`, `sciword550.exe` or `scinoteb550.exe`) and "Run as Administrator". Alternatively, insert the CD; let it autostart, or Run `D:\setup.exe`. **Windows 10/11 users:** for possible problems, please see here (Item 6)

3. At the request for your Serial Number, **type** (not copy and paste) the Serial Number supplied:

   __ __ __ - __ __ __ __ __ - __ __ __ __ __ - __ __ __ __ __ - __ __ __ __ __

   (including the hyphens), and click on 'Install'. **CAUTION:** We recommend that you do NOT accept the default option to overwrite and delete your existing installation. Choose the 'Typical' installation

4. At the end of the installation process, click 'Yes' on the Register dialog box to register now

5. Select the Web option if your computer is connected to the Internet, click on 'Next' (see here) and enter your name (optional), serial number and your Email address for the return of your licence (see here). Alternatively – but slower – Email us to obtain a machine-specific unlock code

6. If you bought a v5.5 British English dictionary, **first see** our February 2014 mailing Item 2:

   __ __ __ - __ __ __ __ __ - __ __ __ __ __ - __ __ __ __ __ - __ __ __ __ __

   Click on OK, then click OK to acknowledge if "the version number in your serial number does not match the installed system" (eg. if you are using a v6.0 serial number with the v5.5 program)

7. Read the licensing information and, if appropriate, select 'I accept this agreement' – OK (see here)

8. Click on 'Register Now' (see here) and you will receive a message saying: "Your license has been received and saved" (see here). Click 'OK'. Remove the CD (if applicable); click on 'Finish' to reboot
   - For **standalone** systems, your licence file will be created automatically by Registering
   - For **home use** systems attached to a campus-wide Site Licence, your installation will not work until the licence information Email has been forwarded to you by your Site Licence Administrator (see here). Copy the entire licence Email to the clipboard, then close and re-open the program to create your licence file. To ensure the Site Licence Administrator can confirm your eligibility, please use your official company/University Email address when Registering in Step 5

9. After rebooting, right-click the v5.5 program icon on the desktop and Run-as-Administrator. Go to Help – System Features, click 'Install Dictionary' and locate `\dict55\InstallD.exe` (either insert the CD and look in `D:\dict55\` , or download the zip file and extract to `c:\sw[p]55\dict55\`)

10. Click on Finish. Close the program and then re-start the program (no need to re-boot)

11. Go to Tools – Spelling – Language Options and set the default language to British English

12. Right-click the v5.5 program icon on the desktop and Run-as-Administrator. In Help – System Features, check you have a dozen or so lines saying 'Available' (including British English, if applicable)
