Version 5.5 Installation Instructions

Please follow these steps carefully to ensure proper installation
If you have not bought the British English dictionary, omit Steps 9, 10 & 11

1. Make sure you have installed a recent version of the Acrobat Reader, and then re-boot

2. Right-click the .exe file you downloaded (swp-pro550.exe, sciword550.exe or scin-oteb550.exe) and select "Run as Administrator". Alternatively, insert the CD; let it autostart, or Run D:\setup.exe. **Windows 10 users:** for possible problems, please see here (Item 6)

3. At the request for your Serial Number, enter the program Serial Number supplied:

    __ __ __ - __ __ __ __ __ - __ __ __ __ __ - __ __ __ __ __ - __ __ __ __ __

    (including the hyphens), and click on 'Install'. **CAUTION:** If you are upgrading from an earlier version, we recommend that you do NOT accept the default option to overwrite and delete your existing installation. The 'Typical' installation will be what most users require

4. At the end of the installation process, click 'Yes' on the Register dialog box to register now

5. Select the Web option if your computer is connected to the Internet, and click on 'Next'. (Otherwise Email **us** to obtain a machine-specific unlock code: this method is slower)

6. If you bought a v5.5 British English dictionary, enter the dictionary Serial Number (including the hyphens) in the Registration Information (but first see our February 2014 mailing Item 2):

    __ __ __ - __ __ __ __ __ - __ __ __ __ __ - __ __ __ __ __ - __ __ __ __ __

    Click on OK, then acknowledge if you are using a v6.0 serial number with the v5.5 program

7. Read the licensing information and, if appropriate, select 'I accept this agreement' – OK

8. Click on 'Register Now' and you will receive a message saying: "Your license has been received and saved". Click 'OK'. Remove the CD (if applicable), and click on 'Finish' to reboot

9. After rebooting, right-click the v5.5 program icon on the desktop and Run as Administrator; go to Help – System Features and click 'Install Dictionary'. To locate InstallD.exe, insert the CD and go to the D:\dict55 folder – or download it here and extract the folder

10. Click on Finish. Close the program and then re-start the program (no need to re-boot)

11. Go to Tools – Spelling – Language Options and set the default language for new documents to British English

12. Click the v5.5 program icon on the desktop. Go to Help – System Features and check you have a dozen or so lines saying 'Available' (including British English, if applicable)
